BF-815

USB-A 2.0 to Serial Port (RS-232) Female Adapter

The BF-815 USB 2.0 to RS-232 Serial Adapter converts a standard USB Type-A port on your desktop or laptop into a DB9 female RS-232 serial port. It bridges the compatibility gap between modern computers and legacy serial peripherals, providing a cost-effective solution for devices without a built-in serial port.

Features

- Compliant with USB 2.0 Full-Speed (12Mbps) specification, backward compatible with USB 1.1
- Chipset: PL2303GT (Built-in RS-232 transceiver)
- Supports RS-232 serial interface with DB9 female connector
- Up to 1Mbps RS-232 baud rate
- Built-in hardware data buffer for stable data transmission
- Supports programmable baud rate and configurable data format
  Data bits: 5, 6, 7, 8
  Stop bits: 1, 1.5, 2
- Supports RTS/CTS, DSR/DTR, XON/XOFF handshaking modes
- USB bus powered, no external power adapter required
- Plug and Play

System Requirements

Windows: 2000 / XP / Vista / 7 / 8 / 8.1 / 10 / 11 (32/64-bit)
Mac OS: OS X 10.6 or above
Linux: Kernel 2.4.31 or above
